

Eco Engineering at a Glance

Business Description

Eco Engineering is a national design-build energy services company specializing in providing turnkey lighting system upgrade services. We design and implement energy saving lighting and lighting control projects with compelling financial paybacks. Eco Engineering helps its customers reduce operating expenses and boost employee productivity, while positively impacting the environment through reduced energy consumption.

Turnkey Services Provided

Facility audit and needs assessment
Lighting and lighting control systems solution design
Materials procurement
Installation management
Material removal and recycling
Utility incentive and tax credit processing
Project financing

Typical Project Components

Lighting technology specific to each installation (i.e. LED, fluorescent, induction, halogen)
Advanced lighting and sensor control technologies
3 year *or less* project payback

Industry Expertise

Commercial Real Estate, Education, Freight Terminals and Distribution Centers, Government, Healthcare, Hospitality, Manufacturing and Retail facilities across North America.

Company History

Eco Engineering was founded in 1993 and today is one of the largest lighting upgrade services providers in the U.S. Since the ownership change in 1998, Eco Engineering has successfully completed more than 1,700 energy efficient lighting projects involving approximately 180 million square feet of facility upgrades. These projects have delivered more than \$340 million in cumulative energy savings to our customers while reducing energy consumption by a combined 3.5 billion kilowatt hours.

Example Clients

Anheuser-Busch, AT&T, Cleveland Clinic, Duke Realty, J.C. Penney, JPMorgan Chase, H.J. Heinz Company, Honeywell, International Paper, Kellogg Company, L Brands, Saint-Gobain, Siemens, Trane, UPS, among many others.
